

# Maps: From Babylon to Google

GEOG 115

MWF 10:10am – 11:00am

New West Room 219

Ashley R. Ward, PhD

Maps are functional spatial and graphic guides, and at the same time, maps are some of humanity's most sophisticated creations that serve as powerful tools for understanding the world and how it works. This course introduces the science and art of map making and will lay the conceptual foundation necessary to understand how and why maps are made and used.

The Internet Mapping Project, Opte Project, Nov. 2011
