GEOG050: Mountain Geography

Professor Diego Riveros-Iregui
Department of Geography
Questions? diegori@unc.edu, (919) 962-6814

Description

Mountains cover a quarter of the Earth's land surface and a quarter of the global population lives in or adjacent to these areas. This first-year seminar examines the physical and human geography of mountain environments and the processes that have created them, shaped them, and sustained them over time scales from years to millions of years.
